

edo MC12 Corsa

Engine specifications

Engine	6.0 ltr. V12
Power	755 hp / (555 kW) at 8000 rpm
Torque	740 Nm (546 ft-lb) at 5500 rpm

Technical data

Top speed	not available
0 – 100 km/h (0 - 62 mph)	not available
Curb weight	1.150 Kg (2535 lb)
Body	Carbon fiber, Monocoque
Transmission	F1, 6-speed
Production	12 + 3 prototypes

Features / modifications

- edo/KW race suspension with lift-function
Racing suspension technology for the road with adjustable compression and rebound damping.
Independently adjustable compression and rebound damping permits truly individual suspension setups.
The unique system with its three different adjustments allows for the low-speed compression damping characteristics to be altered while the high-speed settings, having a strong influence on ride-quality, are fixed.

Newly developed performance exhaust system with electronic butterfly valve control, available remote control.

New forged wheels, front: 10 x 19" and rear: 13 x 20"
with Michelin tires 265/35 19 and 335/30 20
- Newly developed high-performance brake system
- Road-legal in preparation

Subject to alterations without prior notice. As at June 2007
